Developer

Kiprosh

June 2014 - July 2015   Mumbai, India

- Performed analysis, design, development, deployment and support of web based software products on Ruby on Rails technology using Agile SCRUM methodology.
- US based Real Estate product and leading provider of a cloudbased PRM (People Relationship Management) service.
- Developed consumer based features and applications using Ruby on Rails, JavaScript, JQuery, HTML, CSS. Used Test Driven Development (TDD) and pair based programming. Practicing agile methodology including deployment.
- Collaborated with Product Management and User Experience experts regarding product definition, schedule, scope and projectrelated decisions.
- Implemented security feature using Cancan. This feature included implementation of various permutation and combinations of rights for different subusers of the application. Used redis to cache security roles.
- Implemented multiple filters for the app using solr, redis and jquery slider. Worked with numerous plugins like redactor.js, chosen.js, atWho, jQuery UI, FullCalendar, kalendae.
- Selected Accomplishments in the project: Received compliments and appreciation from product owner for implementing some major features including security (using Cancan), daily email notifications for user activities, csv imports, customizations for sending emails to party members, workflow modules and functionalities.
- Knowledge sharing portal Contributed towards development of the project in ruby on rails. Used Test Driven Development (TDD) using RSpec as testing framework and Capybara for

EDUCATION

Behavior Driven Development(BDD) and integration testing.
Implemented a module for automatic saving posts as drafts.
Enabling user to edit drafts and post drafts as articles on the
portal.
